

HTDA-125 & HTDA 7125**NEW GENERATION HF NVIS ANTENNAS**

HTDA-125/7125

- The Electrical Antenna design consists of an active tuner for 2 horizontal dipoles in 90 deg deviation.
- Built-in High Efficiency Automatic Tuner
- Multiple Antenna variations for implementing exact and required radiation patterns
- Installation height 3-50 ft depended on Operational Requirements and the required Elevation and Azimuth angles
- The HTDA is the best solution for Naval applications and Land based applications with limited installation space
